

Hemodialysis

Reimbursement Policy ID: RPC.0097.2100

Recent review date: 11/2025

Next review date: 09/2026

AmeriHealth Caritas Louisiana reimbursement policies and their resulting edits are based on guidelines from established industry sources, such as the Centers for Medicare and Medicaid Services (CMS), the American Medical Association (AMA), state and federal regulatory agencies, and medical specialty professional societies. Reimbursement policies are intended as a general reference and do not constitute a contract or other guarantee of payment. AmeriHealth Caritas Louisiana may use reasonable discretion in interpreting and applying its policies to services provided in a particular case and may modify its policies at any time.

In making claim payment determinations, the health plan also uses coding terminology and methodologies based on accepted industry standards, including Current Procedural Terminology (CPT®); the Healthcare Common Procedure Coding System (HCPCS); and the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM), and other relevant sources. Other factors that may affect payment include medical record documentation, legislative or regulatory mandates, a provider's contract, a member's eligibility in receiving covered services, submission of clean claims, other health plan policies, and other relevant factors. These factors may supplement, modify, or in some cases supersede reimbursement policies.

This reimbursement policy applies to all health care services billed on a CMS-1500 form or its electronic equivalent, or when billed on a UB-04 form or its electronic equivalent.

To the extent that any procedure and/or diagnosis codes are specified in this policy, such inclusion is provided for reference purposes only, may not be all inclusive, and is not intended to serve as billing instructions. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by federal, state, or contractual requirements and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.

Policy Overview

This policy provides a guideline for submission of hemodialysis treatments by End-Stage Renal Disease (ESRD) facilities providing treatment in-facility or in the patient's home.

This policy does not address billing for sessions associated with training or other modalities such as peritoneal dialysis.

Exceptions

N/A

Reimbursement Guidelines

ESRD facilities furnishing services in-facility or in the patient's home are covered for up to 3 treatments per week.

Claims submitted weekly, or monthly, with Bill Type 72X and Revenue Codes 0821 or 0881 should be billed **per line**.

Submission of claims for dialysis sessions can be billed using the 3 different scenarios below.

1. The patients plan of care is hemodialysis 3 times (3X) per week. When each session is furnished, each session should be billed using 90999 without a modifier. These sessions will be reimbursed as routine dialysis services up to 13/14 times per month*
2. For additional dialysis sessions over 13 that are reasonable and necessary, and are supported with medical documentation, should be submitted with 90999.

The expectation is that these three scenarios will be seen on claims with 90999 only. Plan of care (POC) and medical record documentation should be maintained and may be requested.

For claims submitted weekly, the maximum per week is 3. For claims submitted monthly, a maximum of 13/14* per month are allowed, and any units billed beyond the maximum will be denied, unless submitted with medical record documentation to support the additional treatments.

*depending on length of month

Definitions

End Stage Renal Disease (ESRD)

End stage renal disease is the final, permanent stage of chronic kidney disease, where kidney function has declined to the point that the kidneys can no longer function on their own.

Hemodialysis

A medical procedure that removes waste products and excess fluid from the blood when the kidneys are unable to do so.
